하급 :

영어: Using the software for network server requires to comply with the license obligations of GPL-3.0. However, if it is not modified, there is no obligation to disclose the source code or notify the License.

DESCRIPTION

라이선스 전문

GNU AFFERO GENERAL PUBLIC LICENSE Version 3, 19 November 2007 Copyright (C) 2007 Free Software Foundation, Inc. Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed. Preamble The GNU Affero General Public License is a free, copyleft license for software and other kinds of works, specifically designed to ensure cooperation with the community in the case of network server software. The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, our General Public Licenses are intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things. Developers that use our General Public Licenses protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License which gives you legal permission to copy, distribute and/or modify the software. A secondary benefit of defending all users' freedom is that improvements made in alternate versions of the program, if they receive widespread use, become available for other developers to incorporate. Many developers of free software are heartened and encouraged by the resulting cooperation. However, in the case of software used on network servers, this result may fail to come about. The GNU General Public License permits making a modified version and letting the public access it on a server without ever releasing its source code to the public. The GNU Affero General Public License is designed specifically to ensure that, in such cases, the modified source code becomes available to the community. It requires the operator of a network server to provide the source code of the modified version running there to the users of that server Therefore, public use of a modified version, on a publicly accessible server, gives the public access to the source code of the modified version. An older license, called the Affero General Public License and published by Affero, was designed to accomplish similar goals. This is a different license, not a version of the Affero GPL, but Affero has released a new version of the Affero GPL which permits

03 오소리 2.0

03 사이트개편

03 회원사확대

네이버, 현대차 그룹 4개사도 오픈소스SW 정보 공개한 다

- 오소리 프로젝트의 신규 회원으로 네이버, 현대차 합류
- 오픈소스SW 정보 1만 1천여 건 공개 예정

한국저작권위원회(위원장 강석원, 이하 '위원회')는 지난달 30일 네이버 주식회사(대표이사 최수연, 이하 '네이버'), 현대자동차 주식회사(대표이사 장재훈, 이하 '현대차')가 오소리 프로젝트의 신규 회원사로 참여했다고 밝혔다.

오소리 프로젝트는 국내 대기업(삼성전자 주식회사, LG전자 주식회사, 주식회사 카카오)이 보유하고 있는 오픈소스SW 정보를 표준화하여 누구나 쉽게 접근하고 사용할 수 있도록 공개함으로써, 보다 투명하고 신뢰성 있는 오픈소스SW 생태계 구축에 기여하는 것을 목적으로 한다.

Bug fix

기여용 End point 추가

검색 조건 추가

데이터 중복 제거

오픈 소스의 License 검증

License 리뷰

04 Next 오소리

- 데이터 확장
- 데이터 정확도 향상
- API 사용성 개선

감사합니다
